I am opposed to Transportation Corridor Agency (TCA) plans for expanding toll roads in Orange County and will work with community, business and civic groups to bring an end to their development. My opposition is based upon the following:

1. Environmental and Quality of Life impacts
2. Economic Discrimination - seniors, students and those at or below minimum wage who cannot afford the ever increasing fees and tolls
3. Taxpayer funds would be better invested repairing and up-grading the current highway system
4. The current debt obligations of the TCA should be resolved before any new toll roads or expansions are even considered.
