

Theme Week: *To The Moon*

Stargazers guide to the galaxy

Check out these fun apps to help you locate stars, planets, and constellations!

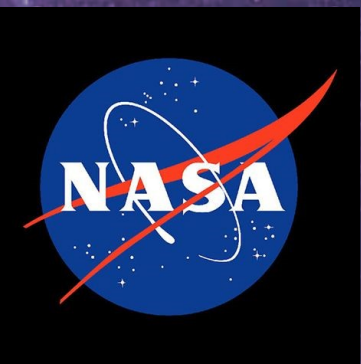

Star Walk 2

This app uses your GPS to find the exact position of celestial bodies- you just have to point your phone at the stars.

Star Walk Kids

Teach young astronomers about stars, constellations, and planets in this kid-friendly app.

NASA App

Not only can you get the latest NASA photos, videos and features- and watch NASA events in real-time- you can look back down at Earth from the International Space Station.
