

Mermaid Week

Crafty Crustaceans

Mermaid Slime

Ingredients:

Elmer's Clear Glue
Blue and Green Food Coloring
Borax
Glitter
Litter Mermaid toys/gems (optional)

Instructions:

1. Pour glue in mixing bowl
2. Mix in blue and green food coloring
3. Mix slime activator. ½ tsp of borax with 1 cup of water.
4. Start adding your borax solution to the glue mixture and mix thoroughly until it starts to slime. Add your borax solution slowly so you don't add too much.
5. Add glitter and mix into slime. Add little toys to make it special and unique.
6. Store in a container with a lid. It will become clear the longer you let it set.

Mermaid Bath Bomb

Ingredients:

1 cup baking soda
1/2 cup citric acid
1/3 cup cornstarch
2 tbsp iridescent glitter (go for biodegradable glitter for an eco-friendly bath bomb)
2 tsp fractionated coconut oil (or substitute another liquid oil)
20 drops of teal gel dye
10 drops of lavender essential oil (or another scent you enjoy)
Water if needed, approximately 1 tsp water
2.75 to 3-inch bath bomb mold
If you don't have citric acid, lemon juice, apple cider vinegar, and cream of tartar are great substitutes. You also don't need to have bath bomb molds. Use cookie cutters, muffin tins, and measuring cups to shape your bath bombs instead.

Instructions:

All you do is whisk the materials together and add enough water that it sticks together. Place it in a mold, and allow it to dry. Then, store your finished mermaid bath bombs in an airtight container or bag.
