## Where it All Started

In coordination with the Orange County Health Care Agency, our firefighters got the first round of the Moderna COVID-19 vaccine on December 26<sup>th</sup>. This was a large step in protecting our crews who take care of our communities.

OCFA's headquarters was then chosen to pilot the COVID-19 vaccine distribution to eligible phase 1A public as determined by the State.

## 2020... A Year for the Books

2020 had been full of challenges for OCFA due to large wildfires, COVID-19 and times of civil unrest. Throughout these more trying times its members continue to step up to ensure our high service levels are upheld and we are prepared to meet our communities' needs. The wildfires experienced in Orange County this year proved that OCFA has prepared well for these threats and we continue to evaluate our response to look for ways to improve. The success that we saw was due in part to the robust response of our crews and support staff. Additional OCFA crews were upstaffed prior to the wind events allowing for a large initial response on the ground and in the air. The newer building codes and brush clearance/management played a large role in our ability to limit property loss. Early evacuations and rapid repopulation efforts were well coordinated with local law enforcement agencies.

All in the meantime OCFA saw rising COVID numbers within the community and their ranks as well. Our response to the pandemic continues to evolve as the challenges evolve. Contingency plans have been developed to prepare for the growing stress on our health care system. Our fire department continues to push through the trials of 2020 to ensure that they are prepared to provide high level service to the citizens of Orange County. Our stations remained fully staffed and covered throughout a very difficult year for all our communities' needs.

# FIRE EXTINGUISHERS

Fire extinguishers can save lives and property, but should only be used if the fire is small, smoke and heat have not filled the room, and if you have a clear escape route. If you're unsure, evacuate immediately and call 9-1-1.

Since fire grows and spreads rapidly, the number one priority is to get out safely.

Orange County Fire Authority

(714) 573-6200 ocfa.org

#### Types of Fire Extinguishers

Multipurpose (ABC) fire extinguishers are recommended for home use. Fire classifications are used to indicate the type of fire they will extinguish.

- A For use with ordinary materials like cloth, wood, and paper.
- B For use with flammable liquids like grease, gasoline, oil, and oil-based paints.
- C For use with electrical equipment that is connected to an outlet.

#### Before Using a Fire Extinguisher

- Alert others that there is a fire and appoint someone to call 9-1-1.
- Make sure the fire is small, not spreading, and that you have a clear escape route.

#### The P.A.S.S. Method

- Pull the pin.
- Aim low. Stand six to eight feet away and point the extinguisher nozzle at the base of the fire.
- Squeeze the lever slowly and evenly.
- Sweep the nozzle from side to side until the fire is completely out.

#### Fire Extinguisher Maintenance

- Keep your extinguisher in plain view and out of the reach of children.
- Read and follow all instructions on the label and check for dents, corrosion or damage monthly.
- Non-rechargeable fire extinguishers should generally be replaced every five to seven years.
- Fire extinguishers are good for one use only. To dispose of an extinguisher, release the pressure by squeezing contents into a trash can. Let the extinguisher sit for 48 hours and then throw it in a trash can. You can also drop off used extinguishers at any household hazardous waste facility.

## **Incident # 20-150497 December 31**<sup>st</sup>

Truck 59 responded to a possible garage fire on Corte Cardelina. Upon arrival Truck 59 found a 2-story, single family resident with sprinkler activation in the garage. No active fire due to sprinklers. Truck 59 shut down the water and electricity. Possible cause of fire due to lithium ion battery for remote control car plugged into power strip.

Incident # 20-128711 November 12<sup>th</sup>

Crews responding to commercial structure fire at Moen Woodworks on Avenida De La Estrella. The Engine 50 crew, along with the OCSD and VFW, drive by to wish veteran Elmo Greve a happy 100<sup>th</sup> birthday from his home on Calle Frontera on October 15<sup>th</sup>.

## Incident # 20-125976 November 5<sup>th</sup>

Truck 59 responded to a structure fire on Calle Saltamontes. Truck 59 arrived to find a 2-story single family home with an audible alarm, light smoke upstairs and water coming through the ceiling of the open garage. The fire was found to be in the wall of a child's bedroom. A single sprinkler head activation kept the fire in check until it could be completely extinguished by fire personnel. The fire was confined to one wall and did not extend into the ceiling/ attic.
