Section 1 | Economic Update

Economic Update

- The Russian invasion into Ukraine and resulting Western sanctions on Russia have fueled volatility in financial markets. The latest escalation has exacerbated inflationary pressures, particularly in energy and commodities, and has caused tightening conditions in financial markets. While consumer spending and economic growth remain strong, we believe an extended conflict in Eastern Europe along with elevated energy prices increases the risk of an economic slowdown later this year. While we expect the Fed to tighten monetary policy, the FOMC has very little margin for error as it attempts to combat inflation without pushing the economy into a recession. Over the near-term, we expect financial market volatility to remain elevated and conditions to remain tighter with heightened geopolitical risk, supply chain bottlenecks and persistent inflation, and the Fed's pivot to less accommodative monetary policy.
- The Federal Open Market Committee (FOMC) raised the federal funds rate by 0.25% at their March 16th meeting to a target range of 0.25% to 0.50%. The Federal Reserve also ended their bond-buying program as expected in March, which included the purchase of treasury and agency mortgage-backed securities. Fed Chair Powell suggested that balance sheet runoff could begin as early as their next meeting in May, sooner than previously anticipated, and that the pace of the unwind will likely be faster than in the previous quantitative tightening cycle. The dot plot favors six additional rate hikes in 2022, which implies a 25 basis point rate hike at each remaining meeting this year, but the Fed hasn't ruled out incorporating one or more 50 basis point hikes to address inflation. The FOMC's Summary of Economic Projections forecasts higher Personal Consumption Expenditure (PCE) inflation this year at 4.3% and a lower growth rate of 2.8% real GDP. We are anticipating additional rates hikes by the Fed this year, but we do not believe that monetary policy is on a pre-set course and expect the Fed's policy adjustments will depend on developments in the economy.
- In March, yields increased dramatically and the curve continued to flatten. The 2-year Treasury yield increased 90 basis points to 2.34%, the 5-year Treasury yield increased 74 basis points to 2.46%, and the 10-year Treasury yield increased 51 basis points to 2.34%. The spread between the 2-year and 10-year Treasury yield declined to zero at March month-end versus 40 basis points at February month-end and 158 basis points one year ago. While the flat yield curve bears watching over the longer run, the spread between 3-month and 10-year treasuries is still steep at about 185 basis points, which indicates likely economic growth in the coming year.

Employment

Source: US Department of Labor

Source: US Department of Labor

The U.S. economy added 431,000 jobs in March, with upward revisions from the prior months totaling 95,000. Trends in employment remain strong, with the three-month moving average payrolls at 561,000 and the six-month moving average at 600,000. Job gains were broad based in March, led by leisure and hospitality and professional and business services. The unemployment rate fell to 3.6% from 3.8%, the lowest level since February 2020. The labor participation rate increased marginally to 62.4% in March from 62.3% in February but remains lower than the pre-pandemic level of 63.4%. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons, fell to 6.9% in March from 7.2% in February, declining below its pre-pandemic level of 7.0% in February 2020. Wage growth accelerated in March, with average hourly earnings rising 5.6% from 5.2% year-over-year. As more participants enter the labor force, wage inflation dynamics should start to moderate, helping to lower the current elevated inflation readings.

Inflation

Consumer Price Index (CPI)

Source: US Department of Labor

Personal Consumption Expenditures (PCE)

Source: US Department of Commerce

Although U.S. consumer prices were in line with expectations in February, inflation hit a 40-year high. The Consumer Price Index (CPI) was up 7.9% year-over-year in February, versus a 7.5% year-over-year gain in January. Core CPI (CPI less food and energy) was up 6.4% year-over-year in February, versus up 6.0% in January. Rising food and rent prices were primary contributors to the big increase, as well as the month-end surge in gas prices, which is likely to be even more pronounced in the March report. The Personal Consumption Expenditures (PCE) index was up 6.4% year-over-year in February, up from 6.0% in January. Core PCE was up 5.4% year-over-year in February, versus up 5.2% in January. Current inflation readings continue to run well above the Fed's longer-run target of around 2.0%. We believe pricing pressures are likely to increase in the coming months considering the recent surge in commodity prices, and will likely remain elevated longer than anticipated as a result of the conflict in Europe.

According to the third estimate, fourth quarter GDP grew at an annualized rate of 6.9%, revised slightly downward from the second estimate of 7.0%. Economic growth reaccelerated in the fourth quarter after slowing to a pace of 2.3% growth in the third quarter, bringing overall GDP growth for 2021 to 5.7%. The most significant contributor to fourth quarter growth was inventory build, potentially reflecting some easing in supply chain disruptions. The fourth-quarter's build will make for a tough comparison in the first quarter. The consensus estimate calls for 1.1% GDP growth in the first quarter, 3.0% growth in the current quarter, and 3.3% growth for 2022.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody's and Fitch respectively.

Monthly Cash Flow - Receipts and Disbursements
FY 2022**

Summary of Monthly Activity

The net cash outflow for the month of March is \$1.2 million. The City has \$38.8 million invested in LAIF which is available to address any significant cash outflow requirements during the month.

Receipts:

Property taxes are received in December, January, April and May and are the high receipt months. Other than these months, receipts have relatively small fluctuations. March's projected receipts were \$8.1 million and actual receipts were \$9.8 million. Actual receipts were \$1.7 million higher than projected due mainly to the higher taxes (\$120,000) and timing of other receipts in a variety of areas (greens fees, Measure M, and ambulance receipts).

Disbursements:

Cash outflow for March was \$11.0 million. The amount of disbursements vary based on the number of pay periods in a month, the number of accounts payable dates in a month and the activity submitted from other departments. March's projected disbursements were \$13.1 million and actual disbursements were \$11.0 million. Actual disbursements were \$2.1 million lower than projected. Salaries, police contract services and capital outlay expenditures were lower than expected due to lower costs and timing. These were offset slightly by higher purchased water costs and a one-time UAL payment of \$1 million.
