FOR IMMEDIATE RELEASE

Casa Romantica Emergency Slope Stabilization Repairs

May 25, 2023...San Clemente, California... The City's contractor (Alliance Diversified Enterprises) is expected to complete the majority of the emergency slope stabilization repairs work on Friday, May 26, 2023 and will be performing minor grading and site clean-up for a couple of days next week.

The emergency work included removing excess soil and reshaping the slope to reduce the chance of additional material sliding down on the railroad tracks or up against the condominium building to the north. The work was a temporary stabilization effort and more permanent work will be needed to secure the Casa Romantica building as well as the entire slope in the future. The City worked closely with OCTA and Metrolink on coordination of the work.
