GREEN LINE TROLLEY RESUMES FOR SUMMER 2023

6/29/2023...San Clemente, CA... At its June 20, 2023 regular meeting, the City Council of San Clemente authorized funding for the continuation of the Green Line Trolley to operate daily in July, August, and September during the same hours as the Blue Line and the Red Line. The Blue Line is the northernmost route, connecting the Outlets at San Clemente to a shared stop with the Dana Point Trolley on Camino de Estrella; the Red Line is the “downtown” route, connecting the Outlets at San Clemente to the Pier; and the Green Line is the southern route, connecting the Pier to San Clemente State Beach and campground. The City is excited to offer this continued service to provide more transportation options and easier access to shopping and recreation during the busiest season of the year. The Green Line route will end September 30th, but City staff will pursue grant funding with OCTA in hopes of establishing a longer term funding source for this route beginning in 2024. Residents and visitors can learn more about the Trolley and see a full map of the route at www.san-clemente.org/trolley. The live Trolley Tracker is available at <https://sctrolley.com>.

The Green Line route will be served by rented shuttle vehicles, so riders should be ready to board when they see this white shuttle approach the Green Line stops:
