

I have contacted the city as many of the residents on Barcelona have in regards to dangerous speeder-slowing our street down, re-stripping, congestion, parking permits for residents as Ralph patron and the commercial building at the top of our street all use our street to park leaving residents out of parking in front of their own homes and if we do park behind the commercial building we are towed. To add insult to all of this you blocked the left hand turn to Esplanade which has a beautiful center divider!!! So what do the cars do....come down Barcelona and make a U-turn in front of my house at 106, 105 and 107. I can count 30 or more U-turns in any given day with cars reaching 35 mph within 25 feet of the signal!!! I am waiting for my car to have a hit and run at some point!!!!Not to mention traffic backs up waiting for the signal of 4-5 houses down from intersection. You think we

residents at the top of the street can get out or into our driveways safely?!?! Not on your life! We have all experienced rude conduct with drivers passing us on the wrong side of us because we want to enter or exit our driveways! You have made Barcelona the new freeway to the beach and parking for commercial vehicles and Ralphy patrons when we walk. Not to mention the thorough fare for emergency vehicles, skate boarders.

I didn't sign up for this!!!! 24 years on this street and thank god as residents we look out, support and fight together. It was so unfair that you make the decisions for us when you don't live on our street! There are more accidents at our intersection along with worst parking lot of any Ralphy happening then accidents from a left hand turn on Esplanade.

Remove the delineators! Spread the traffic out, allow all streets to carry the load. Barcelona residents have had enough!
