### FOR IMMEDIATE RELEASE

#### **Construction Mobilization Related to Re-Start of Sand Replenishment Project**

April 19, 2024... San Clemente, California... The U.S. Army Corps of Engineers has advised the City that its contractor, Manson Construction, is bringing construction equipment back to the area beginning this weekend to work on the San Clemente Beach Nourishment project.

At this time, the public will see equipment and materials arrive in a staging area, located in the upper portion of the Pier Bowl parking lot, and site preparations beginning near the base of pier. The first delivery of new sand is expected to arrive the week of April 22.

Public safety remains a top priority; therefore, the beach and water will be temporarily closed in the area of active construction. Signs will be posted regarding temporary beach closures. The work will occur seven days a week to allow the quickest sand placement possible.

More information is available at [www.san-clemente.org/beachsand](http://www.san-clemente.org/beachsand). The City appreciates the continued support, cooperation and patience of the community while we replenish our beaches!
