FOR IMMEDIATE RELEASE

First Phase Complete for San Clemente Shoreline Sand Replenishment Project

May 23, 2024... San Clemente, California... The first phase of the San Clemente Shoreline Sand Replenishment Project is now complete! Please join the City of San Clemente, community leaders, and project partners to celebrate this exciting milestone with an event on Friday, May 31, 2024 at 2:00pm near the base of the San Clemente Pier.

A total of 251,000 cubic yards of sand is scheduled to be dredged and placed between Linda Lane and T-Street beaches in this placement cycle. Approximately half of that quantity has been successfully dredged and placed, with the remaining quantity planned to be delivered this fall.

The project contractor will be removing equipment from the beach in the coming weeks allowing the public to enjoy the newly expanded sandy beach for the summer season. More information is available at www.san-clemente.org/beachsand.
